Preliminary Amendment - Nygren et al. In Vitro Selection and Optional Identification.... Docket 2039.004 Page 3

Version With Markings to Show Changes Made

- 6. (Amended) A method as claimed in [any one of claims 3 to 5] <u>claim 3</u> wherein the variable portion is a member of a polypeptide library.
- 7. (Amended) A method as claimed in [any one of the preceding claims] <u>claim 1</u> wherein steps (a) and (b) are performed iteratively for more than one cycle.
- 9. (Amended) A method as claimed in [any one of the preceding claims] <u>claim 1</u> wherein the solid support system is particulate.
- 11. (Amended) A method as claimed in [any preceding] claim $\underline{1}$ wherein the immobilised means for biospecific interaction is a target molecule for the desired polypeptide.
- 12. (Amended) A method as claimed in [any one of claims 1 to 10] <u>claim 1</u> wherein the immobilised means for biospecific interaction is a cognate binding partner for an affinity binding partner which forms a fusion protein with the desired polypeptide.
- 13. (Amended) A nucleic acid molecule or polypeptide when selected according to the method of [any preceding] claim 1.
